

# Process & Decision Documentation

## Project/Assignment Decisions

In completing Side Quest #1, I learned how to create a GitHub account and how to create a sketch using Visual Studio Code. I also learned how to successfully upload a sketch and have it linked to my GitHub account.

### *GenAI Documentation*

I used ChatGPT when I received an error saying that “some jobs were not successful” when I tried saving my pages at the last step of the assignment. Therefore, I added “.nojekyll” to my line of code.
